Apex Detail Studio

A student prototype for **Financial Management / International Financial Management** (BBA, Spring 2026, KASBIT). Instructor: Huma Abubakar.

Group members: Rao Daniyal Ahmed – [ID] and Abdullah bin Waris – [ID]

Business idea

Apex Detail Studio is a car detailing and ceramic coating workshop in Karachi. We clean, polish and protect cars so the paint looks showroom-new and stays that way. Customers book a slot, bring the car to our workshop and collect it the same day (ceramic coating takes 2 to 3 days).

Services and prices (PKR, standard sedan)

Service	Price	Material cost per car
Premium Wash & Wax	3,500	600
Interior Deep Clean	8,000	1,500
Full Detail	18,000	3,500
Ceramic Coating (2 year)	55,000	18,000
Ceramic Coating Pro (5 year)	95,000	32,000

Startup costs

Item	PKR
Equipment (polishers, pressure washer, extractor, lights)	400,000
Workshop setup	200,000
Rent deposit (2 months)	160,000
Opening chemicals and coating stock	250,000
Branding, website, signage	70,000
Registration and legal	30,000
Launch marketing	90,000
Working capital reserve	300,000
Total	**1,500,000**

Sources of funds

The two partners fund the startup equally and each owns 50% of the business.

Partner	PKR	Share
Rao Daniyal Ahmed	750,000	50%
Abdullah bin Waris	750,000	50%
Total	**1,500,000**	100%

Monthly sales, expenses and profit (steady state)

Expected cars per month: 50 washes, 20 interior cleans, 12 full details, 4 two-year coatings, 1 five-year coating.

Item	PKR per month
Sales	**866,000**
Materials and chemicals	206,000
Workshop rent	80,000
Salaries (lead detailer 55,000; detailer 40,000; helper 28,000; two partners 50,000 each)	223,000
Electricity, water, gas	35,000
Marketing	40,000
Maintenance, internet, other	30,000
Total expenses	**614,000**
Expected profit (sales - expenses)	**252,000**

- Profit margin: about 29.1%. Profit is shared equally, about PKR 126,000 per partner per month, on top of each partner's PKR 50,000 salary.
- Fixed costs: 408,000 per month. Break-even sales: about 535,345 per month (roughly 62% of expected sales).
- Payback of the 1,500,000 investment: about 6 months at full volume, or about 9 months if the first three months run at 40%, 60% and 80% of expected volume.
- Profit is before tax. Equipment depreciation is not included, to keep the model simple.

International finance angle: dollar risk

About 70% of our materials (coatings, polishes, chemicals) are imported and priced in USD. The prototype assumes a base rate of PKR 276.50 per USD (1 USD = 276.50 PKR), and lets you move it between 250 and 400. If the rupee weakens, material costs rise and profit falls. Our responses are bulk buying of stock, quarterly price reviews and adding local suppliers.

Files

- `index.html`: the website prototype (open it in a browser, no installation needed). It contains the business introduction, services with prices, startup costs, the monthly sales/expenses/profit calculator, the dollar risk check and a sample order form.

- `Apex_Detail_Studio_Plan.pptx` and `Apex_Detail_Studio_Plan.pdf`: the presentation (PowerPoint and PDF copy).
- `README.md` and `Apex_Detail_Studio_README.pdf`: this file (Markdown and PDF copy).

AI tools used

- **Claude (Anthropic):** helped us choose the business idea, estimate costs, structure the financial model and generate the website code and the presentation.
- We checked the calculations ourselves, and all prices and costs are estimates and not real quotes.

Live website

After enabling GitHub Pages (Settings > Pages > Deploy from branch > main, root folder), the site is available at `https://stdrao19946-code.github.io/apex-detail-studio/`.
